

Same sigmas for all the time trends

(a) observed cases per day

(b) smoothed curve from (a)

(c) index of government response

(d) minimal intervals produced by our test

Different sigmas for each time trend

(a) observed cases per day

(b) smoothed curve from (a)

(c) index of government response

(d) minimal intervals produced by our test

Same bandwidth-free sigmas for all the time trends

(a) observed cases per day

(b) smoothed curve from (a)

(c) index of government response

(d) minimal intervals produced by our test

# Different bandwidth-free sigmas for each time trend

(a) observed cases per day

(b) smoothed curve from (a)

(c) index of government response

(d) minimal intervals produced by our test
